

ANIMAL JACKET CUSTOMIZATION

AS THE MANUFACTURER, we can modify and redesign jackets to **match your specific requirements and resulting in:**

- Reduced animal-to-human contact time
- Reduced stress and associated biases
- Improved comfort
- Reduced risk of complications
- Faster and easier acclimation
- Reduced training complexity and variability between technicians
- Reduced the cost of labor associated with technicians

OUR JACKETS EVOLVE to meet the modern needs of biomedical researchers. Our team can respond quickly to integrate new and innovative design features.

HERE IS A LIST OF OUR COMMON CUSTOMIZATIONS

ATTACHMENTS

- Additional Velcro straps, clips, snaps, buttons, and zippers in any required location
- D-rings and heavy duty clips
- External zipper covers
- Velcro flaps overlying jacket and pocket zippers
- Additional attachment points for suspension
- Additional attachments for restraint systems

ADVANTAGES - securing zippers in place & additional security for group housing

DIFFERENT JACKET COLORS

- To distinguish sizes or treatment groups
- To match company colors
- Color-coded stitching on the inserts of dermal jackets

ADVANTAGES - Preventing errors in dosing and administration, improving overview of entire study group, video tracking of different animals in group housing

ADDITIONAL LAYERS

- Internal zipper protection
- Internal padding at key location

ADVANTAGES - Preventing chewing/damage of important equipment and chaffing on skin. Providing additional security for group housing.

POCKETS

- Extensive range of pouch sizes and designs
- Matched to specific pieces of equipment
- Selection of fabrics for pocket

ADVANTAGES - Adapting to specificities of equipment, enabling best practices at the animal interface

PEARL MARKERS

- For video tracking

ADVANTAGES - More sensitive detection of abnormalities, through precise location of the pearls. Monitoring general gait or more specific body sections.

SPECIAL ADJUSTMENTS

- Dermal applications
- Tether anchoring points (location, size, type)
- Pouches & electronic connectors
- Access points and opening sizes

ADVANTAGES - Creating a more precise and consistent method of administration/detection

CUSTOM SIZES

- For specific animal species

ADVANTAGES - Ensuring best fit, comfort and security for the animal. Increasing acceptance and biocompatibility

PAIRING WITH TELEMETRY SYSTEMS

- DSI & Emka

CLIPS TO ATTACH COLLARS

ADVANTAGES - Protecting expensive technological equipment

SPECIALLY LOCATED HOLES

- For lead wires, catheters and more

STRETCH SLEEVES OR CUFFS

- For dog and swine jackets

ADVANTAGES - Reducing rubbing; can prevent leads and tubing from being pulled out from under jacket

INTEGRATION OF INNOVATIVE FABRICS

ADVANTAGES - Optimizing biocompatibility

We carry an extensive inventory of finished products and raw materials. All your customization information is also kept on file. As a result, products can be shipped within a few days of authorization.
